

BAG STRAINER SYSTEM

The Diversitech Bag Strainer System provides an automated, easy way to remove sludge from Diversitech's Typhoon WX Series of wet dust collectors. The pump draws in water and particulate from the wet collector reservoir and pumps the material through a bag strainer where the sludge settles before clean water is pumped back into the collector.

Benefits:

- Automatically removes sludge from water tank
- Easy disposal of collected sludge
- Self-priming centrifugal pump
