

DUCTED DOWNDRAFT TABLES

This modular, heavy-duty Ducted Downdraft Table draws contaminants away from the operators breathing zone through the perforated grating. An integrated baffle tray maintains even velocity over the operator's working zone to ensure the efficient removal of dust.

The Ducted Downdraft Table can be connected to an existing or new filtration system and provides a flexible, portable solution that can be easily repositioned. A modular design allows tables to be grouped back to back, side by side, or in any configuration that fits your application.

Flexible, portable, downdraft solution for dust, smoke, or fumes produced from welding, bench grinding, torch cutting, spray painting, sanding, finishing, soldering, or mixing.

Available standard models:

- 3' x 4'
- 3' x 6'
- 3' x 8'

**Custom configurations available on request.*

Benefits:

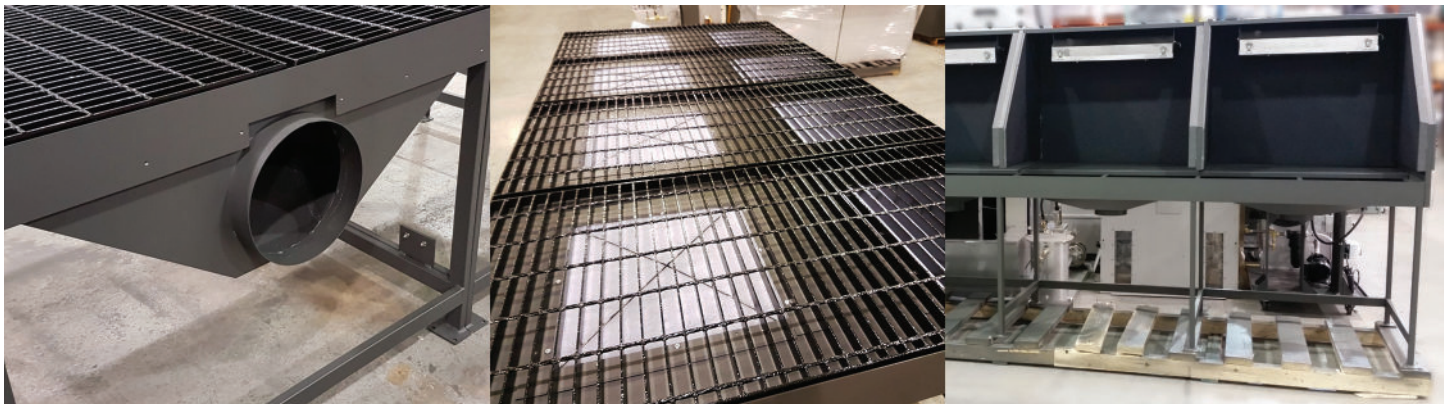

- Modular and customizable design
- Rugged Heavy-Duty Construction
- Complies with OSHA guidelines for safe capture of dust, smoke, and weld fumes

Features:

- 14ga. Mild Steel Construction
- Powder Coated Dark Gray
- Heavy-Duty Steel Bar Grating
- Flanged Legs with Bolt Holes for Anchorage to Ground
- Integrated hopper and overhang

Options:

- Side & Back Walls
- Dust-proof Light Kit
- Backdraft Hood
- Blue Cushion Grid Matting
- Industrial Casters
