FUME TRACKER 2.0™

Self-positioning Fume Capture Arm

The Fume Tracker 2.0™ protects operators by automatically repositioning itself above the fume source. Operators will eliminate time spent repositioning the hood and focus on the task at hand.

Fume Tracker 2.0™
10' capture arm

Features:

New! Photo-diode Sensor Technology

- The primary photo-diode sensors provides faster arc detection and smoother arm travel
- Offers a larger tracking window, and very consistent weld arc detection

New! Adjustable Distance Control

- Photo-diode sensors dynamically monitor and maintain distance to weld arc
- Hood-mounted adjustment knob allows operator to set distance above the arc

New! Infrared Collision Avoidance Sensor Ring

- Multiple infrared sensors detect the presence of objects nearby
- If an obstacle is detected, the arm stops, and restarts only when the obstacle is removed
- Collision detection distances are factory set, but field adjustable

Options:

- Available with extension booms of 5' or 10'
- Available Wall Mount or Portable
