

OPEN FACE SPRAY BOOTHS

BY DIVERSITECH

Diversitech's open face spray booths offer a customizable finishing enclosure for many spray painting and coating applications. The open face spray booth design allows for easy access in and out of the paint booth. The booth generates a cross-draft airflow pattern, pulling overspray into the backdraft hood equipped with paint arrestor filters, and is then exhausted outside.

Open face spray booths are available in a wide range of sizes and with various accessories. Common options include dust-proof light kits, crane slots, doors or strip curtain, and interlocks with spray painting equipment. For powder coating applications, a self-cleaning dust collection booth is recommended so that the powder can be collected and recovered for re-use.

Benefits:

- Capture-at-source for cleaner air
- Customizable enclosure
- Complies with OSHA guidelines for controlling weld fumes

Features:

- Front access open face design
- Booths are self-supporting
- Integrated filtration media

Options:

- Access Doors
- Control Panels
- High static exhaust fan
- Front Filter Doors
- Strip curtain
- Electrical Outlets
- Dust-proof light kits
