

AIR CLEANING SOLUTIONS FOR WELDING EDUCATION

Lightweight welding booth designed for essential protection in training and light-duty welding environments

- Powder-coated steel construction
- Anti-flash UV welding curtain
- Compact, cost-effective design
- Optional fume extraction arm, C-clamp, and dust-proof lighting

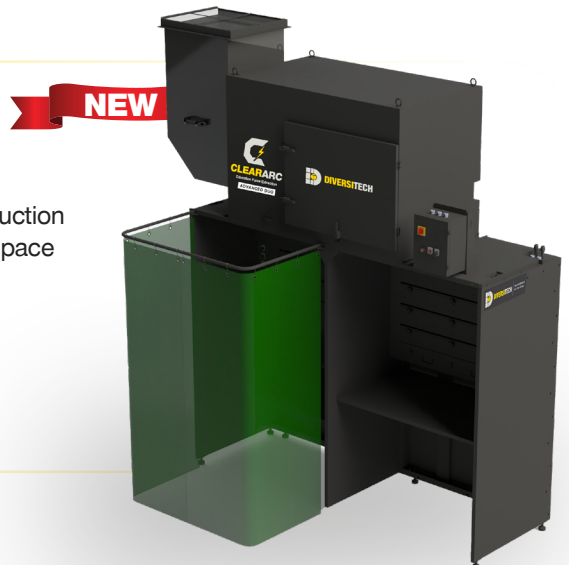

Durable, self-contained welding booths designed for solo or duo workstations, offering flexibility to connect to external fume

- Available in Solo or Duo configurations
- Heavy-duty, self-contained design
- Compatible with external fume collectors
- Optional fume extraction arm, C-clamp, and dust-proof lighting

A complete welding workstation combining durable booth construction with integrated fume collection for a cleaner, more efficient workspace

- Available in Solo or Duo configurations
- Built in gas or compressed air lines
- Backdraft & updraft airflow with swing-open cleanout panel
- Compatible with top-mount, or external collectors
- Optional fume extraction arm, C-clamp, and dust-proof lighting

MOBILE WELDING TRAINING SOLUTIONS

NEW

CUSTOM-BUILT MOBILE WELDING LABS

- ✓ Mobile welding trailers from 30' to 52'
- ✓ Customizable number of welding workstations
- ✓ Semi-trailer, gooseneck, and tow trailer configurations

WELDING & FUME EXTRACTION

- Individual welding stations with fume extraction options
- Downdraft tables, extraction arms, or central extraction systems
- Welding tables, weld test trees, and fabrication equipment options

COMFORT & FUNCTIONALITY

- Insulated walls and ceilings
- Optional air conditioning and heating
- Secure gas cylinder storage and electrical connections
- Shore power or generator power
- Custom power configurations to support training requirements
